

Turnpike/SR 91 Resurface and Guardrail FPID: 432827-1,-3

March 2015

Description:

This project will resurface the Turnpike/SR 91 in Osceola County from MP 239.3 to MP 249.3. This project also includes guardrail, pavement marking improvements, and resurfacing and ramp improvements at the southbound off- and northbound on-ramps up to the cross road at CR 525 (MP 239.5), the northbound off-ramp at US 192/441 (MP 242.5), the northbound on-, southbound off- and on-ramps at US 192/441 (MP 244.5), and the northbound on- and off-ramps, and the southbound on- and off-ramps at Osceola Parkway (MP 248.7).

Benefits:

- The resurfacing restores the roadway to good pavement condition and increases the overall service life of the roadway.
- The guardrail is a safety improvement that helps minimize the risk of vehicle crossovers in the event of an accident.

Status:

Construction for this Resurfacing project is scheduled to begin in 2016.

Investment:

The Turnpike has funded \$16.9 million for the construction phase of this project.
