

Sawgrass Expressway/Coral Ridge Drive Interchange Improvements (MP 14) FM 435461-1

March 2015

Description:

This project includes interchange improvements at the Sawgrass Expressway interchange at Coral Ridge Drive in Broward County. This interchange is proposed to be reconfigured into a diverging diamond interchange to better accommodate the heavy left turn movements. The interchange improvements will better serve future traffic growth in the Coral Springs and Parkland areas and improve mobility along Sawgrass Expressway.

Benefits:

- Improves interchange operations to meet future traffic demand.
- Provides improved traffic flow for left turning movements.
- Innovative interchange design.

Status:

A concept study has been completed for the interchange modification. This project is scheduled for construction in FY 2019.

Investment:

This project has been funded for a total of 3.4 million by FDOT, Florida's Turnpike Enterprise.
