

Campbell Drive Interchange Modification

FPID: 435462-1

March 2015

Description:

This project modifies the existing interchange at the northbound on-ramp terminal intersection on Campbell Drive. A second northbound on-ramp will be constructed for westbound Campbell Drive and northbound SW 152nd Avenue in the northeast quadrant of the interchange. This new ramp will serve interchange traffic from Campbell Drive and SW 152nd Avenue. Access modifications will also be made so that the northbound on-ramp exclusively serves as an access for eastbound Campbell Drive traffic. As part of this project, the southbound off-ramp will be widened to 2-lanes and intersection improvements will be done at all terminal ramps connecting to Campbell Drive.

Benefits:

- Provides additional capacity on Campbell Drive.
- Eliminates operational issues at the northbound Campbell Drive on ramp.

Status:

This project is scheduled to begin construction in 2016.

Investment:

This project is funded by Florida's Turnpike for a total of \$17,324,000.
